and Systems Solutions, Services & Support

eurotherm.co.uk

Life Is On

everywhere, for everyone, and at every moment

At Eurotherm we passionately support our customers with specialist knowledge and experience to help achieve process excellence through machine automation efficiency and regulatory compliance.

Our vision is to be the preferred supplier of machine automation products, applications, power and process control systems and services for customers in specialist industries, while our mission is to solve our customers' problems with pioneering products, bespoke systems and industry expertise.

Our wide range of products is rich in features and designed for easy operation and reduced engineering time. They contain market-leading control algorithms, recording and data management strategies which add value to industrial processes, improving quality, reducing waste and helping to keep data protected for as long as it is needed.

Decades of experience in providing world-class process control, recording and automation are supported by a continuous research and development program to so that our solutions continually grow to meet modern challenges faced across a wide range of industries. Our customers are fully supported by a global sales and service network of highly qualified engineering personnel who understand the applications and industries they serve.

PID Controllers, Indicators and Alarm Units

Single Loop Controllers 4

Advanced and Multi Loop Controllers 5

Indicators 6

Alarm Units 6

Plastics Process Controller 7

Recorders and Data Acquisition

Paperless/Graphic 8

Solid State Relays (SSRs) and Power Controllers

Solid State Relays (SSRs) and Simple Thyristor Controllers 9

Power Control 10

Drives and Soft Starters

AC Drives 11

Soft Starters 11

DC Drives 11

Machine and Process Automation Controllers

Programmable Automation Controllers (PACs)

Programmable Logic Controllers (PLCs) 12

Eurotherm Software

Eurotherm Product Software 13

Eurotherm System Software 14

Signal Conditioners

I/O Signal Conditioners 15 -16

Ancillary Equipment

Probes 17

Communication Devices 17

Field Calibrators..... 17

Actuators

Valve Assemblies and Components 18

Eurotherm Online Services - EOS

EOS Advisor 19

eCAT™ tablet application for calibration 19

Drives and Soft Starters

Check region for availability. For full specifications see: eurotherm.co.uk/acdrives

AC Drives and Soft Starters	Variable Speed Drive
	
Features	Single and three phase variable speed drives and soft starters
Types	Low Voltage AC Process Drives, Machine Drives, Building Drives, General Purpose AC Drives, Soft Starters, MVAC Process Drive, Machine Drives. Check here for latest Schneider Electric Drives http://www.schneider-electric.us/en/product-category/50000-ac-drives-and-soft-starters/
Ranges	Altivar, Altivar process, Altivar Machine, Altivar Plus, Altivar Plus-LH, Altivar AFE, Altivar Lift, Altistart
Control Modes	Voltage/frequency, Flux vector control with or without sensor, Kn2 quadratic ratio, Energy saving ratio, ENA system, Vector control with or without speed feedback, constant torque, variable standard torque, optimized torque mode, PM (permanent magnet) motor
Communications	Modbus RTU, Modbus TCP, Modbus serial link, CANopen, DeviceNet, PROFIBUS DP, Profinet, Fipio, METASYS N2, APOGEE FLN, BACnet, LonWorks, Modbus/Uni-Telway, EtherNet/IP (RSTP), interbus, CC-Link, METAYS N2, APOGEE FLN, EtherCAT, EtherNet/IP, POWERLINK
Software	SoMove, SoMachine, SoMove Mobile, Simple Loader, Multi-Loader, PCSof for ATV 212

DC Drives			
			
Features	ER-340/-680/-1200	ER-3200i/3600XRi	ER-PL/ER-PLX
Power Rating	0.55-1.8kW (at 180V armature voltage)	2.2-11kW (at 320V armature voltage)	15-1000kW (at 460V armature voltage)
Supply Voltage	110-240V, 30-60V	110/240, 240/415V	100-480V, 100-690V
Phases	1-Phase	1-Phase	3-Phase
Control Mode	1- and 4-Quadrant	1 and 4-Quadrant	1 and 4-Quadrant
Communications	—	—	Profibus DP, DeviceNet, CANopen, Modbus RTU
Armature Current	3.4-12.2A	4-48A	36-2250A
Configuration Software	—	—	ER-PL Pilot and SAVVY

Eurotherm Product Software

Typical configuration, data reporting, analysis and visualization capability from Eurotherm, and open industry standard IEC61131-3 CODESYS® PLC platform for Eurotherm E+PLC controllers.

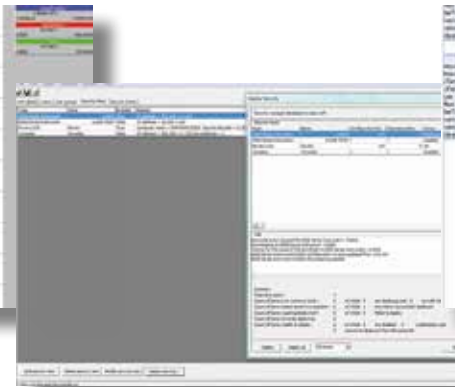

Eurotherm iTools configuration software

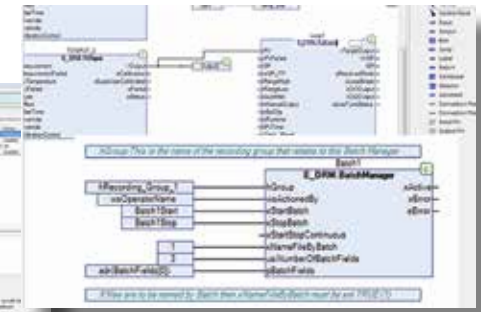

Eurotherm Bridge remote visualization and configuration

Data viewing with Eurotherm Review

Eurotherm Security Manager access control

CODESYS engineering environment

Configuration software

Eurotherm iTools

One versatile platform for configuration and monitoring of Eurotherm temperature and process controllers, power controllers and recorders.

A complete engineering studio for configuration, data logging, communication and monitoring.

6000 Series software

Eurotherm Bridge

A powerful yet easy to use tool providing visualization and configuration to any Eurotherm 6000 series instrument from any PC anywhere in the world.

With the correct security access, the user can view any number of networked devices using the Local Area Network, intranet or internet.

Data Viewing/Reporting

Eurotherm Review

PC based software package that allows the display and printing of archived data files from the Eurotherm range of data acquisition units.

Access Control

Security Manager

A common tool across multiple ranges.

Configures:

- 6000 Series Recorder
- Eycon Visual Supervisor
- Operations Viewer
- Eurotherm Review

Combination PLC software

CODESYS®

Eurotherm E+PLC use open industry standard IEC61131-3 CODESYS® PLC platform. This enables simplified engineering through a single integrated programming and visualization development environment which also offers OEM customization and user level access to help protect engineering IP.

For more information and downloads go to your local Eurotherm website >software

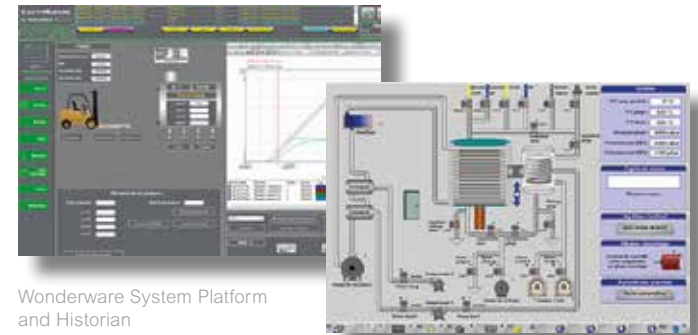

Eurotherm System Software

Everyone talks about connecting the enterprise. Eurotherm® and Wonderware® have been doing it for years with a versatile suite of software tools including Wonderware System Platform and Wonderware PAC software built into our systems which offer:

Configuration tools	Visualization Packages	
<p>Project Studio / Developer</p> <ul style="list-style-type: none"> • Engineering tools for process automation • Single point configuration • Integrated development environment 	<p>Process Viewer</p> <ul style="list-style-type: none"> • Low cost HMI • Use of iTools Active-X to visualize Eurotherm controllers • Contains iTools and EuroMBUS OPC server environment • LINTools and LIN OPC Server 	<p>Operation Server and Viewer</p> <ul style="list-style-type: none"> • Comprehensive user authorization and tamper resistance via Security Manager • Supports Ethernet, ARCnet and serial connections • Auditor features meet 21 CFR Part 11

- Reduced engineering effort with autobuild and single project environment
- Powerful graphic tools
- Instant access to data from you plant with online monitoring from any node
- OPC standards inbuilt to I/O drivers
- Built in Security Manager – without making operation and procedures cumbersome
- Built in technologies to meet requirements such as FDA 21 CFR Part 11 and AMS2750E

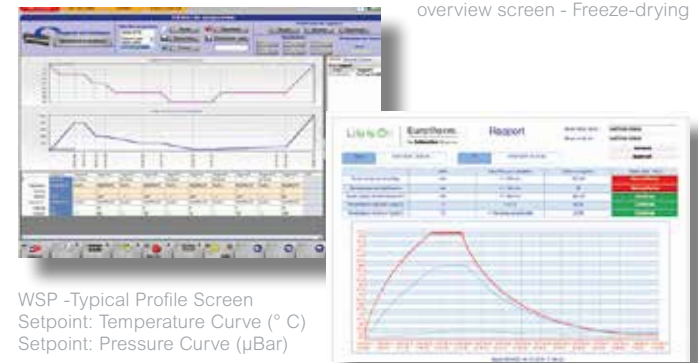

Data Reporting		
<p>Information Manager</p> <p>Provides system connectivity between the Eurotherm control network and the enterprise.</p> <ul style="list-style-type: none"> • Captures and stores all plant data all of the time • Includes Wonderware Historian software • Obtains data from our UHH with our Store & Forward functionality 	<p>Wonderware Historian client</p> <p>Trending and analysis software provides plant data analysis and reporting solutions for Information Manager - giving better managed plant performance.</p>	<p>Dream Report™</p> <p>Integrated reporting solution for industrial automation. Designed to extract data from almost any data source and automatically provide reports to anybody anywhere.</p> <p>Dream Report fits perfectly for both continuous and batch process applications.</p>

Wonderware System Platform and Historian

WSP - Typical process control overview screen - Freeze-drying

Network support	Applications	
<p>OPC Servers and I/O Drivers for:</p> <ul style="list-style-type: none"> • Single point configuration Modbus devices / I/O drivers • LIN devices • Wonderware SuiteLink™ protocol • Includes advanced communication diagnostic and monitoring tools. • WWPAC is provided to enable integration of PAC instruments into Wonderware System Platform • Intellution FIX32 and iFIX 	<p>Security Manager</p> <p>A common security tool across multiple ranges.</p> <p>Configures:</p> <ul style="list-style-type: none"> • 6000 Series Recorder • Eycon Visual Supervisor • Operations Viewer • Eurotherm Review 	<p>Eurotherm Control and Application Modules</p> <ul style="list-style-type: none"> • Standard supervisory workstation interface • Standard library blocks • Operator faceplate • Engineer point display

WSP -Typical Profile Screen
Setpoint: Temperature Curve (° C)
Setpoint: Pressure Curve (µBar)

Typical Eurotherm Dream Report. Phases of heat/cool, temperature and setpoint analysis.

Mounting	High density DIN rail	High density DIN rail	IQRL Power bus or DIN rail both AC DC	DIN rail	DIN rail	Field mount housing or head or DIN rail	DIN rail
Wiring	Removable terminals	Fixed terminals	Removable terminals	Removable terminals	Fixed terminals	Fixed terminals	Fixed terminals
Special Features	Smart Power, Ethernet Communications	ASIC Reliability	2 ch versions, Signal splitters, Math functions, Field configurable I/P type versions	Multi Channel versions	Splitter, Isolation, Linearisation	Optional display, HART, 2 I/P channels with math	Stand alone 4kV Isolation (option)
Calibration via	TouchCal	Potentiometer, G478 TouchCal	TouchCal	Potentiometer	Lifetime cal	Potentiometer	—

Signal Conditioners ...continued

I/O Signal Conditioners	Signal Conversion and Isolation	
		
Features	VisiPak	Action Pak AP
Input Types	DC/Current, RTD, Thermocouple, Potentiometer, Strain Gauge, Frequency	DC/Current, RTD, Thermocouple, Potentiometer, Strain Gauge, AC Volts/Current, Frequency
Output Types	2A, 264VAC Resistive Relays, Loop-Powered LCD indicator	-5+5Vdc, -10+10Vdc, 0-20mAdc, 4-20mAdc, 2 SPDT relays
Isolation	500Vdc Input/Output/Power	1000-1500Vdc Input/Output/Power
Power	120-240Vac via Terminals, 85-265Vac	120-240Vac via Terminals, 9-30Vdc (Optional)
Mounting	Front Panel/Enclosure	Plug-in-8-Pin or 11-Pin Base Socket, High Density DIN rail
Wiring	Fixed terminals	Fixed terminals
Special Features	Loop-Power, Provides a Digital Display of Rate or Totalized Count from a Frequency / Pulse input	Frequency divider, DC to Frequency conversion
Calibration via	Potentiometer	Potentiometer

Ancillary Equipment

Probes and Communication Devices	Probes	Comms Convertors	
			
Features	In-Situ Carbon Probe AP1	ACP Carbon Probe	Universal Isolated Interface Converter - KD485
Output	1.00-2.00V dc	0 to 1250mV dc	—
Readout	% carbon probe into 8MΩ	0.01 to 1.6 % carbon % oxygen *	—
Power Supply	—	—	+7 - +35V dc
Power Consumption	—	—	—
Accuracy	±0.05 weight % carbon in normal operating range	+/-).05 weight % Carbon in normal operating range	—
Response Time	Less than 1.0 second	Less than 1.0 second	—
Thermocouple	Type K, R & S	Type K, N, R, S	—
Isolation	—	—	2000V ac
Ports	—	—	2 Asynchronous ports, TX & RX signals only
Port Parameters	—	—	-STD: 0-115200 baud, all character formats -ADE/PROG: 30-115200 baud, n/e/o parity, 7/8 data bits, 1/2 stop bits
Mounting	—	—	DIN Rail
Options	—	Quick Disconnect Connectors available for Eurotherm, FCC and MMi probes	Interface: Standard product Port 1 is RS232 Port 2 is RS422/485 Any combination of RS232, 422/485

Field Calibrators	Multifunction Temperature Calibrator
	
Features	Memocal 2000
24V Loop Power Supply	✓
Accuracy	±0.015% of span
Calibration Software	—
Input/Output Type	15 type TC - 2 type RTD - mV - Ma Ohms
Leather carrying case	Option
Multi Channel Data Logging	—
Power Supply	External charge and rechargeable Ni Mh batteries
Programmable Ramp Generator	✓
Real Time Clock with Memory	—
Serial Comm. Port	EIA 232 Modbus
Standard	Complies with AMS2750 field instrument
Panel size (DIN)	One channel IN/OUT
Display Type	Multifuncion LCD

* Sensors should be used with controlling, recording and indicating instruments having an input impedance of 10 meg ohms or higher.

Actuators

EOS - Eurotherm Online Services

Seamlessly transform equipment data into useful, actionable, and auditable information

Eurotherm™ Online Services (EOS) by Schneider Electric™ is a trusted Software as a Service (SaaS) solution, for anywhere, anytime management and access to plant information. Ideal for industries such as aerospace, automotive, life sciences, health care and food & beverage, the tools combine the in-depth knowledge Eurotherm has on managing data, technology and calibration services. EOS is completely scalable; relevant to small scale manufacturing and large, multi-site businesses.

EOS Advisor

A unique online solution for managing equipment and staff more efficiently. One integrated system that helps you meet all your compliance requirements.

eCAT™ - Tablet application for calibration

Eurotherm offers professional services supported by leading industry expertise and is recognised in the market place for its comprehensive, high quality, responsive offerings. In the same way we develop our products to deliver leading, innovative solutions, it makes sense that we develop our services in the same way.

The EOS tablet application for calibration (eCAT) is a mobile compatible tool that reduces the drawbacks of a paper based system and improves the consistency of the calibration process.

Calibration status of all plant equipment can be checked using a simple, intuitive web interface. Information such as calibration certificates can be quickly retrieved as and when required by authorized users. It enables customers to easily maximize plant availability and aids compliance with regulatory standards such as Nadcap, AMS2750 and CQI-9.

EOS Advisor applications leverage technology developed for Industrial Internet of Things and Industry 4.0 applications.

- Help increase equipment efficiency
- Establish robust universal workflow
- Help reduce risk of human error
- Simplify searches
- Help reduce operational costs

With the eCAT tool, an instrument test produces a certificate and QR label

Just scan the label for an instant view. Why not try it yourself?

These technologies improve cost efficiencies, enable predictive maintenance, and result in competitive advantage. Unlike many other technology solutions that require a “rip-and-replace” mentality - these solutions are a natural fit to an existing process setup and the technology easily wraps around current installations.

Check all scheduled activities easily on the EOS Advisor planning page.

Experience the advantages of EOS Advisor with a three-month trial.

Systems and Solutions (available globally)

What can Eurotherm solutions do for you?

In a word, **CONFIDENCE**:

Confidence in our application knowledge

Confidence in our control products and systems capability

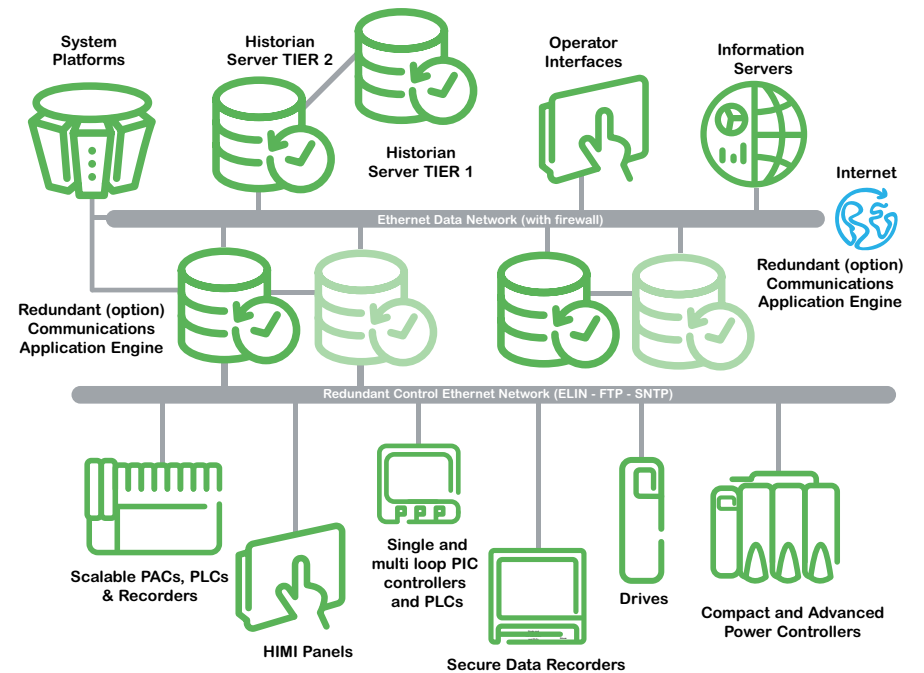

Confidence in optimizing value for money

We provide an expert team to work with your people in a successful partnership.

We know your application

Eurotherm has significant experience in machine control and process control across a broad range of markets. Based on our application specific expertise, we have numerous successful installations around the world. The more challenging your control problem, the more value we bring.

Our core competency is process control applications and this expertise is what separates us from the typical system integrator.

Thermal solution architecture

Global Turnkey Capability

In addition to Eurotherm expertise in process and machine control products, we also have a broad range of experience and engineering services to implement a complete solution for your application.

These services include:

Engineering Services

- Custom engineered solutions
 - discrete instrumentation up to small and medium DCS systems
- Creating collaborative specifications
- System design
- System engineering
- Panel & cabinet building
- System Testing (SAT)
- Factory Acceptance Testing (FAT)
- On-site installation & wiring services
- System installation, commissioning & startup services
- Validation IQ, OQ, PQ
- Comprehensive project management (including GAMP@5 & 21 CFR Part 11 Methodologies)
- Complete project documentation
- Network analysis
- Custom reports
- Analytics

Process Optimization

Most businesses are driving down hard on costs and striving to improve performance. We can play a role in this process by bringing experienced engineers to your site, auditing the process and identifying possible improvements. Monitoring equipment can be installed to understand performance and costs, to create a baseline upon which the improvements can be measured. The solutions will range from simple enhancements, re-commissioning or possibly taking a completely fresh approach to the control solution. Typically, this work is completed when new projects are undertaken, but we believe that applying the experience of our engineers can improve the productivity plant at any time.

Service and Support

[Check region for availability.](#)

Accreditation

- Calibration: electrical, pressure, time, temperature and humidity
- Thermal Uniformity Surveys: (TUS) ovens, furnaces, freezers, chambers and System Accuracy Tests (SAT)
- Thermal imaging

Technical Services

- Free telephone and web based support via dedicated help desk
- Extended warranties available
- Loop tuning and optimization
- Business continuity plans
- Service contracts
 - Breakdown: 24hr cover 7 days a week including response to site
 - Parts management, including bonded spares placed on site
 - Preventative maintenance and health checks
 - Remote diagnostic support
 - Backups and recovery
 - Software and application support
 - Bespoke Service Level Assessments (SLA)
 - Global Support

Eurotherm Online Services

- Software as a Service (SaaS) - see page | 19 for details

Validation Services (GAMP)

- Auditing and consultation
- Complete validation to GAMP@5 guidelines & 21 CFR Part 11 requirements
- Services to produce documentation for validation include:
 - User requirements, functional specification and design specifications
 - System build
 - Installation, operational and performance qualifications
- Services to maintain the validated state including:
 - Calibration
 - Like-for-like parts management to minimize revalidation effort
 - Controlled installation of patches and upgrades
 - System operation and administration
 - Backups and recovery solutions
 - Training for system operators and administrators

Repair and Support Services

- Repair option
- Premium: 24hr from receipt of module
- Express: 3 working days from receipt of module
- Standard: 5 Working days from receipt of module
- Upgrades, calibration, refurbished equipment for sale

Training, Commissioning and Troubleshooting

Training

- Formal classroom based including bespoke courses
- Informal hands-on “question & answer” at customer’s site
- Self-paced training modules

Commissioning and Troubleshooting

Our commissioning services include everything from configuring an instrument before it is shipped, though to on-site installation, troubleshooting startup and optimization. During this process your staff can be trained on the configuration and operator routine. Our engineers can work alone, or alongside your plant engineering staff to reduce costs and enable valuable knowledge transfer.

Refurbishing existing panels to upgrade the control and acquisition equipment is becoming increasingly popular. The Eurotherm engineer will take control of the complete project including panel and wiring modifications. This can provide a cost efficient method of gaining compliance to regulatory standards from ANSI, NADCAP and FDA.
